

APIC 2009 ABSTRACTS

APIC 36th Annual Educational Conference & International Meeting
Fort Lauderdale, FL
June 7-11, 2009

CONTENTS

Abstract Awards (denoted by*)	E10
Poster Abstracts	E13
Oral Abstracts	E181
Author Index	E198

POSTER ABSTRACTS

Antimicrobial Resistance..... E13

- 1-1 An Outbreak of VanB-Type *Enterococcus faecium* Colonization That Showed Heterogeneous Resistance to Vancomycin in a University Hospital in Japan
- 1-2 Analyzing Antibiotic Sensitivities for Methicillin Resistant *Staphylococcus aureus* to Provide Treatment Recommendations to Community Physicians
- 1-3 Antibiotic Resistance Pattern of Urinary Tract Isolates from Outpatients in Sirte, Libya During the Period, 2005 - 2007
- 1-4 Detection of Heterogeneous Vancomycin Intermediate *Staphylococcus aureus* (hetero-VISA) in MRSA of Japanese Clinical Isolates
- 1-6 Identification and Control of Carbapenem-Resistant *Klebsiella pneumoniae* (KPC) in a Community Hospital
- 1-7 Increasing In vitro Resistance to Moxifloxacin and Gatifloxacin Among *S. epidermidis* Isolates Recovered from Patients with Endophthalmitis Following Cataract Surgery
- 1-8 Significant Increase in USA 300 Community-Acquired-Methicillin-Resistant *Staphylococcus aureus* CA-MRSA as a Cause of Healthcare-Acquired MRSA Infections HA-MRSA-I

Antisepsis/Disinfection/Sterilization E18

- 2-9 A Novel Disinfectant Chemistry for the Control of *Clostridium difficile* Spores on Hard Surfaces
- 2-10 Activity of Bleach Solutions Against MRSA Using a Pigskin Model
- 2-11 Bacterial Growth on Cleaned Reusable ECG Leadwires: Do Cleaning Methods Matter?
- 2-12 Effect of Long-Term Disinfection on Clinical Contact Surfaces
- 2-13 Effectiveness of a Lotion-Based Hand Treatment Against Spore-Forming Bacteria, Including *Clostridium Difficile*
- 2-14 Effectiveness of Alcohols, Hand Rubs and Scrubs Against Murine Norovirus – A Surrogate of Human Norovirus
- 2-15 Efficacy and Safety of Glutaraldehyde-Based High Level Disinfectant Products
- 2-16 Efficacy of a Diluted Bleach Solution Against *Clostridium difficile* Spores
- 2-17 Evaluation of Quat Absorption and Efficacy of Cleaning Cloths
- 2-18 *In Vitro* Microbicidal Characterization Study for MR06B7, A New Alcohol-Based Hand Rub Enhanced Inactivation Efficacy Against Non-Enveloped Viruses
- 2-19 Limited Efficacy of Hand Washing Against Spores of *Clostridium difficile* and Surrogate Organisms
- 2-20 Methicillin-Resistant *Staphylococcus aureus* Present on Dental Student Laptop Computers
- 2-22 *Novel Approach for the Validation of Disinfectants Against Hepatitis C Virus
- 2-23 Rapid Containment of a Norovirus Outbreak in an Acute Care Hospital Rehabilitation Unit
- 2-23A The Assessment of the Sporicidal Activity of Selected Environmental Surface Disinfectants Using Spores of *Clostridium difficile*

Bioterrorism/Disaster/Emergency Preparedness E29

- 3-24 Biocontainment Unit Rationale and Infection Control Interface
- 3-25 Drive Through to Prevent the Flu (Or Anything Else That's Bugging You) A Model for Mass Medication Distribution in a Public Health Emergency
- 3-26 Influx of Communicable Patients: Testing Surge Capacity with Community Outbreak of Norovirus
- 3-27 Norovirus Made Easy? Lessons Learned From a Disaster Exercise Using New Tools and Procedures
- 3-28 Pandemic Planning.....All Roads Lead to the Hospital
- 3-29 Survey of Community Residents to Assess Readiness for a Pandemic
- 3-30 Use of Mass Vaccination Drills to Increase Employee Influenza Vaccination Rates

Cost-Effectiveness/Cost Benefit Analysis E34

- 4-31 Are We Wasting or Saving Dollars-in the Dialysis Centres?
- 4-32 Cost-Effectiveness of PCR Screening for Methicillin-Resistant *Staphylococcus aureus* at a Large Regional Hospital
- 4-33 Risk Factors for MRSA Colonization in the Intensive Care Unit
- 4-34 Urinary Tract Infection Rates Among Medicare Patients: Implications for the Medicare Inpatient Payment System

Device-Related Infections and/or Site Specific Infections E37

- 5-35 A Multi-Faceted Approach to Reducing Risk of Bloodstream Infections for Pediatric Rehabilitation Patients Receiving Total Parenteral Nutrition
- 5-36 A Regional Trauma Intensive Care Unit (ICU) Thirty-One Month Experience in Decreasing Central Venous Catheter-Bloodstream Infections (CVC-BSI)
- 5-37 Bacterial Meningitis Post-Administration of Epidural Anesthesia in an Obstetrical Patient in a Tertiary Care Facility
- 5-38 Bedside Review of Each Central Venous Catheter-Associated Bloodstream Infection (CVC BSI) Identifies Barriers to Prevention of Infection
- 5-39 Central Line-Associated Blood-Stream Infections in the ICU: The Struggle to Achieve and the Effort to Maintain Zero
- 5-40 Design Features of Needleless Vascular Access Devices May Contribute to an Increase in Microbial Contamination and Subsequent Catheter-Related Bloodstream Infections
- 5-41 Designing Prevention of Catheter-Related Urinary Tract Infections: How to Achieve a Fifty Percent Reduction
- 5-42 Efficacy Testing of a Chest Drain Containing an Antimicrobial Agent
- 5-44 Healthcare-Acquired Catheter-Associated Urinary Tract Infections in a Community Hospital Setting: How do We Keep Patients Safe and Keep Reimbursement?
- 5-45 Impact of a Closed Luer Access Split-Septum Device on Catheter-Related Bloodstream Infection (CR-BSI) Rates in a Community Hospital Adult Population
- 5-46 Implement the Site Care Bundle to Decrease Catheter-Related Infections in Cancer Patients with Long-Term Catheters
- 5-47 Implementation of the Ventilator Bundle Along with Routine Oral Care Leads to Significant Reduction of Ventilator-Associated Pneumonia (VAP)
- 5-48 *In Vitro* Evaluation of Viable Microorganisms on the Surface of a Luer Access Device Treated with Two Antimicrobial Agents
- 5-49 Maintaining Zero Central Line-Associated Blood Stream Infections CLA-BSI in the NICU over 2 years
- 5-50 Measured Impact of Two Strategies to Lower Surgical Site Infection Rates
- 5-51 Methods Used to Decrease Ventilator-Associated Pneumonia in a Surgical Intensive Care Unit
- 5-52 Multidisciplinary Journey to Reduce Catheter Related Urinary Tract Infections
- 5-53 Multi-Faceted Interventions to Prevent Bloodstream MRSA Infections
- 5-55 Prevention of Catheter-Associated Urinary Tract Infections Using Silver Impregnated Catheters: Does Silver Matter?
- 5-56 Reaching Zero Ventilator-Associated Pneumonia (VAP) Using a Standard Order Set
- 5-57 Reducing Central Line-Associated Bloodstream Infections - Getting Back to Basics

- 5-58 Successful Program to Decrease Catheter-Associated Bacteremia in Interventional Radiology
- 5-59 Suction Controls as a Vector for Hospital Acquired Infections
- 5-60 Surgical Site Infections in Cesarean Section Patients Using the National Healthcare Safety Network Criteria
- 5-62 The Effects of Daily 2% CHG Cloth Bathing on Catheter-Related Bloodstream Infection Rates in a Surgical Intensive Care Unit
- 5-63 The Role of Post-op Care in Preventing SSI
- 5-64 Use of a Protocol to Remove Urinary Catheters Reduces Catheter-Associated Urinary Tract Infections in Trauma Patients
- 5-65 Use of a Weekly Device Use Ratio to Track Central Line-Associated Bloodstream Infections Outside the Intensive Care Unit
- 5-66 What's Your Line? Evaluating the Risk Associated With Line Type Following a Sudden Increase in Central Line-Associated Blood Stream Infections

Emerging and Reemerging Infectious Diseases E61

- 6-67 Epidemiology and Risk Factors for *Clostridium difficile* Infection in Children
- 6-68 Implementation of Disposable Blood Pressure Cuffs as a Novel Approach to Reduce Fomite Transmission of Healthcare-Associated (HCA) *Clostridium difficile* Infection (CDI) in a Community Hospital or Twice Implemented is Once Credible
- 6-69 Issues in the Care of a Lepromatous Hansen's Disease Case in an Acute Care Facility

Environment of Care/Construction/Remediation E63

- 7-70 Construction Project Anonymous...Where's the ICRA?
- 7-71 Development, Implementation, and Monitoring of a Comprehensive Infection Control Risk Assessment (ICRA) Program for Construction and Renovation
- 7-72 Lowering the Curtain on Healthcare-Associated Infections
- 7-73 Role of Environment of Care Internal Audits in Maintaining Readiness for External Surveys from Accrediting or Regulatory Bodies
- 7-74 Routine Implementation of Water Restriction to Prevent Legionnaires' Disease

Infection Prevention and Control Programs E66

- 8-75 A Pilot Study for a Community-Level Infection Control Program
- 8-76 A Successful Campaign to Certify Employees in Hand Hygiene Competency
- 8-77 APIC Vision 2012 - Creating a Preferred Future: The Role of Local Chapters in Achieving the Strategic Priorities and Objectives
- 8-78 Assessment of Knowledge About Hands Cleaning and Isolation Precautions by Physicians in Training at a Hospital in Colombia
- 8-79 Availability and Use of Hand Hygiene Products, by Visitors, at the Entry Points of Hospitals
- 8-80 Control of Healthcare-Associated *Staphylococcus aureus* Infections with Syndrome-Based Expanded Precautions
- 8-81 Developing a Model for Infection Control in the Independent Healthcare Sector in the United Kingdom
- 8-82 Developing an Infection Prevention and Control Program in the Ambulatory Dialysis Care Setting: The Singapore Experience
- 8-83 Developing the Role of a Perioperative Infection Preventionist (IP) in an Orthopedic Specialty Hospital
- 8-84 Epidemiology of Hospital-Acquired Infections in a Tertiary Care Center in Lebanon
- 8-85 Evaluation of an Inpatient Influenza Vaccination Program
- 8-86 Fecal Containment Using Indwelling Bowel Catheters to Potentially Prevent Multidrug-Resistant Organism Nosocomial Infections
- 8-87 Hospital Infection Prevention Programs with Extremely Limited Resources in Tochigi, Rural and Real Japan: Rx - TRICK or Treat?
- 8-88 Implementation of a Catheter-Associated Urinary Tract Infection Bundle in an Academic Medical Center
- 8-89 Implementation, Outcomes and Evaluation of Hospital-Wide MRSA Active Surveillance Culture (ASC) Program
- 8-91 Incidence of Instrument Compromise in TKA: Comparison of Standard Instruments vs. Single Use Instruments

- 8-92 Infection Control Collaboration Around the World; Japan and the United Kingdom
- 8-93 Infection Prevention Coaches Impact Hand Hygiene and Influenza Immunization Rates
- 8-94 Laser-Assisted Nasal Decolonization of MRSA, (*In Vitro*, Animal and Pilot Clinical Study)
- 8-95 Making Hand Hygiene a Patient Safety Expectation in a Tertiary Medical Center
- 8-96 Management & Containment of Patients Colonized/ Infected with Carbapenem Resistant *Klebsiella Pneumonia* CRKP in an Acute Care Hospital in an Endemic Country
- 8-97 Methicillin-Resistant *Staphylococcus aureus* (MRSA) screening in a Neonatal Intensive Care Unit: A Comprehensive Strategy for Infection Prevention
- 8-98 Multihospital Study to Evaluate Central Line-Associated Bloodstream Infections Outside the ICU Setting
- 8-99 *Negative Predictive Value of Toxin Enzyme Immunoassays for *Clostridium difficile* in a Hospital Setting
- 8-100 Prevalence of Methicillin-Resistant *Staphylococcus aureus* Colonization and Impact of Active Surveillance and Control Measures in a Large Community Hospital System
- 8-101 Prospective Attainment of a Zero Central Line-Associated Blood Stream Infection Rate: A Clear Enhanced Process to Success
- 8-102 Reduction of MRSA and VRE Acquisition by Bundling Daily 2%Chlorhexidine Gluconate (CHG) Bath and Active Surveillance Culture (ASC) for MRSA at a Tertiary Care Hospital
- 8-103 Re-Organization of an Infection Prevention and Control Department by Service Lines at a Large Academic Medical Center
- 8-104 Return to Hand Hygiene: The Effectiveness of an Innovative Hand Hygiene Campaign
- 8-105 Revision of Contact Precaution Requirements for Hospital Visitors
- 8-106 Simple and Cost-Effective Strategies to Reduce the Occurrence of Bloodstream Infections (BSIs)
- 8-107 Spiral of Quality Improvement: Prevention of Nosocomial Infections in a Neonatal Intensive Care Unit (NICU) in Israel
- 8-108 Statewide Survey on Methicillin-Resistant *Staphylococcus aureus* Infection Control Practices in Hospitals
- 8-109 Unit Based Nurse Liaison: Their Role in Infection Prevention in a Large Tertiary Care Hospital
- 8-110 Using a Graduate Infection Control Certificate Program to Educate Infection Control Professionals
- 8-111 Using Collaboratives to Develop a Consensus Model of Elements of Australian Prevention and Control Programs

**Mandatory Public Reporting of Healthcare Associated Infections/
Consumer Education E92**

- 9-112 Mandatory Reporting of CLA-BSI: Evaluation of a Web-Based Reporting Tool

Outbreak Investigation E93

- 10-113 A Collaborative Approach to Outbreak Investigation: Some Interesting Discoveries and New Allies
- 10-114 A Virus Among Us: The Importance of Infection Prevention Measures During an Increase in Viral Gastroenteritis Illness on a Geriatric Psychiatric Unit
- 10-115 Amino Acid Solutions as a Risk Factor in Catheter-Related Bloodstream Infection Outbreaks Caused by *Bacillus sp.* in Japan
- 10-116 An Outbreak Investigation in an Outpatient Eye Care Center
- 10-117 An Outbreak of Bloodstream Infections with *Stenotrophomonas maltophilia* and *Pantoea agglomerans* in an Adult ICU
- 10-118 *Helocobacter cinaedi* Bloodstream Infection and Cellulitis
- 10-119 Interdisciplinary Strategy to Control an Outbreak of Norovirus at a North Carolina Acute Care Hospital
- 10-120 Investigation of an Outbreak of Multidrug-Resistant *Acinetobacter baumannii* Infection in the Surgical ICU of the University of Massachusetts Hospital
- 10-121 Investigation of an Outbreak of Resistant *Acinetobacter baumannii* in a Military Medical Center
- 10-122 Lessons Learned from Personal Protective Equipment Omission in an Endotoxin Inhalation Exposure in a Cooling Tower
- 10-123 Multidisciplinary Approach in Characterizing and Managing a *Clostridium difficile* Outbreak in an Inpatient Bone Marrow Transplant Unit
- 10-124 Patient Cloth Chairs and *Clostridium difficile* Outbreak
- 10-125 Pertussis Exposure in NICU
- 10-126 Pertussis Outbreak Among Healthcare Workers: Tdap too Little, too Late

- 10-127 Rapid Interventions Limit Transmission of Vancomycin Resistant *Enterococci* in a Neonatal Care Unit
- 10-128 The Relationship Between Smoking and the Outbreaks of Norovirus-Associated Gastroenteritis in a Mental Hospital in Japan

Patient Safety..... E107

- 11-129 A Multi-Disciplinary Approach for VAP Prevention: Building a Culture of Safety for ICU Patients
- 11-130 A Picture is Worth a Thousand Words
- 11-131 An Educational Brochure to Reduce the Risk of Infection in the Hospital Setting: Knowledge Assessment and Acceptance from Patients
- 11-132 Benefits of Infection Preventionist with Floor Nurse Councils
- 11-133 Glass Particles Contamination in Single Dose Ampoules: Patient Safety Concern
- 11-134 Implementation of the VA MRSA Bundle at a 132 Bed Acute Care VA Medical Center Shows Promise in Long-Range Rate Reductions for Healthcare-Associated MRSA Infection
- 11-135 Infection Prevention Cohort Unit: A Strategy to Promote Patient Safety
- 11-136 Myiasis and Infection Control: A Collaborative Approach to the Diagnosis, Treatment and Care of a Patient at a Level I Trauma Center
- 11-137 Preventing Falls in Hospitalized Patients on Isolation Precautions
- 11-138 Standardization of Isolation Signage in Washington State Hospitals
- 11-139 To Ask or not to Ask? The Question of Patients Asking Healthcare Personnel to Perform Hand Hygiene: Results of a Formative Assessment of a Hand Hygiene Video
- 11-140 *To Buff or Not to Buff, That is the Question
- 11-141 Vigilant Use of Selective Infection Control Measures By Staff Help to Sustain Reduction of *Clostridium difficile* Infections at a VA Community Living Center

Product Evaluation..... E115

- 12-142 Computer Keyboard Covers Impregnated with a Novel Antimicrobial Polymer Significantly Reduce Microbial Contamination
- 12-143 Efficacy of Alcohol-Based Hand Sanitizers (ABHS): A Hand Wipe (65.9% Ethanol) Exceeds the Killing Capacity of a Gel Rub (62% Ethanol)
- 12-144 Evaluation of the RPS Adeno Dedetector System to Confirm Adenoviral Conjunctivitis
- 12-145 Investigation of the Rate of Glove Perforations in Orthopedic Procedures with an Indicator Underglove System (IUS) in a Japanese Hospital
- 12-146 Staff Perception of a Mobile High-Efficiency Particulate Air (HEPA) Filtration Unit and a Mobile Air Treatment Unit Employing Non-Thermal-Plasma Reactors
- 12-147 Watch Out for Infection Control - Successful Removal of Wrist Watches by Developing an Extendable Fob Watch

Quality Management Systems/Process Improvement/Adverse Outcomes..... E119

- 13-148 A Collaborative, Multidisciplinary Approach to Investigating Clusters of Infections and Improving Orthopedic Surgical Outcomes
- 13-149 An Assessment of Opportunities for Reducing Bladder Catheter Use at A Busy University-Affiliated Hospital Emergency Department
- 13-150 Case Control Study vs. Six Sigma Approach to Decrease Surgical Site Infections After CABG Surgery
- 13-151 Cultural and Clinical Changes in the NICU: Impact of a Multi-Faceted Program on Reduction of CVC Associated BSI
- 13-152 Direct Observation Model to Ensure Compliance with Urinary Catheter Care Process Measures
- 13-153 Establishing Quality Processes in a Rural Sterile Processing Department
- 13-154 Flash Sterilization Process Improvement and Correlation with Surgical Site Infections
- 13-155 Impact of Improved Environmental Cleaning and Hand Hygiene Compliance on *Clostridium difficile* Rates in a Surgical Intensive Care Unit
- 13-156 Impact of Staff Engagement on Changing Compliance with the Ventilator-Associated Pneumonia Bundle

- 13-157 Improving Hand Hygiene Compliance Through Culture Change Effort Translates Into Decrease in Healthcare Acquired MRSA Infections
- 13-158 Improving Patient Safety Through Increased Hand Hygiene Compliance in the Dialysis Center
- 13-159 Infection Preventionist Decreases Length of Stay for Suspected Pulmonary Tuberculosis Patients
- 13-160 Monitoring Compliance of Infection Prevention Interventions Through the Use of a Patient Centered Dashboard
- 13-161 Process Improvement Investigation Standards for Prevention of Healthcare-Associated Infections
- 13-162 Reducing Blood Culture Contamination at a Military Medical Center
- 13-163 The Impact of a Microsoft SharePoint® Portal on the Efficiency and Work Practices of an Infection Prevention and Control Team
- 13-164 The Importance of Reliable and Reproducible Data Collection in the Age of Public Reporting
- 13-165 The Use of ATP Bioluminescence to Assess the Efficacy of Modified Cleaning Programs: A Potential Problem Encountered within the Intensive Care Setting
- 13-166 Transport Workers as Champions in Improvement Process: "The Fanny Pack Project"
- 13-167 VAP Bundle Readiness: A Review of Documented Oral Care Practices in an Intensive Care Unit
- 13-168 Who is Responsible for Cleaning That?

Regulatory Compliance E134

- 14-169 Development of A Template for Annual Evaluation, Risk Assessment and Planning: A Large System's Strategy
- 14-170 Laundry Services for Health Care: Compiling Regulatory Mandates, Recommendations, and Best Practices for Infection Prevention

Safety/Healthcare Worker and/or Patient E136

- 15-171 A System Wide Approach to Improving Healthcare Workers Influenza Vaccination Compliance
- 15-172 Analyzing Subcutaneous Needlestick Injuries Using Lean Six Sigma Methodology
- 15-173 Can Education Make a Difference in the Influenza Vaccination Rate?
- 15-174 Development and Institution of Uniform Isolation Signs Across a State
- 15-175 Development of a Safety Needle Waiver Process in a Major Medical Center
- 15-176 Implementation of a Change in Isolation Signage Results in a 40% Decrease in *Clostridium difficile* Over a Twelve Month Period of Time
- 15-177 Improving Influenza Vaccination Rates in a Community Medical Center
- 15-178 Reduction of Sharps Injuries with a Reusable Sharps Containment Safety Device - A 28 Hospital Study
- 15-179 Success of Flu Vaccine for Employees: Collaborative Approach to Increasing the Number of HCW Participation in Flu Campaign
- 15-180 The Ergonomics of Retraction: A Comparison of Two Brands of Retractable Syringes

Special Populations (Infections in the Immunocompromised Host, Pediatrics) E144

- 16-181 A Neurosurgical Multidisciplinary Infection Prevention Team: Adverse Event Review and Assessment to Reduce Class I Surgical Site Infections (SSI)
- 16-182 A Sign of the Times: Compliance with Isolation Precautions in a Children's Hospital
- 16-183 Implementing a Catheter-Associated Blood Stream Infection Prevention Bundle in the Neonatal Intensive Care Unit - Will it Reduce Methicillin Resistant *Staphylococcus aureus*?
- 16-184 Moving from Unit-Based Projects to an Institution-wide Cardiovascular (CV) Surgical Site Infection (SSI) Prevention Initiative: A Bundle Approach
- 16-185 Protecting Children: Parents Attitudes About Influenza Vaccination
- 16-186 Simple and Cost-Effective Strategies to Reduce the Occurrence of Ventilator-Associated Pneumonia VAP
- 16-187 Success of a Ventilator-Associated Pneumonia Prevention Bundle in a Level IIIb Neonatal Intensive Care Unit

16-188 The Power of Collaboration: Learning from Multi-Disciplinary Bedside Analysis for Central Line-Associated Bloodstream Infections (CLA-BSI's) in a Tertiary Care Neonatal Intensive Care Unit (NICU)

Specialized Settings (Ambulatory Care, Behavioral Health, Long Term Care, Home care) E150

- 17-189 A Model for Infection Prevention in Ambulatory Care Facilities
- 17-190 A Multidisciplinary Method to Decrease Surgical Site Infection Rates Utilizing a Back to Basics Approach
- 17-191 Disinfection of Senior/Assisted Living Long-Term Care Facilities for Prevention of Legionnaires' Disease: Efficacy of a Novel Short Course (30-day) Treatment with Copper-silver Ionization
- 17-192 Evaluation of a Hand Hygiene Intervention in K-5 Public Schools
- 17-193 Increasing Post-Discharge Surgical Site Infection (SSI) Surveillance in the Obstetrical /Gynecological (OB/GYN) Population through Collaboration and Improved Communication with Ambulatory Care
- 17-194 Lights, Camera, Action! Development of a New Educational Video for Long-Term Care
- 17-195 Maryland Long Term Care Facility Infection Prevention and Control Resources and Practices: A Five Year Reassessment
- 17-196 Personal Hygiene Education and Training for Elementary Aged Students in a Large Urban School District Setting: They can do it Themselves
- 17-197 Positive Impact of Daily Syndromic Surveillance in Early Detection of Respiratory and Gastroenteritis Outbreaks in Long-Term Care

Staff Training/Competency/Compliance E156

- 18-199 Career Path for the New Infection Preventionist Using the Dreyfus Model of Skills Acquisition
- 18-200 Development of a New Monitoring System for the Evaluation of Hand Hygiene Compliance; Hand Hygiene Activity Recognition Using a Triaxial Accelerometer Network System
- 18-201 Direct Observation in the Operating Room: First Step to Best Practices
- 18-202 Effective Feedback of Hand Hygiene, Isolation Attire and Cleaned Equipment Compliance Data
- 18-203 Essential Roles of the Staff Nurse in Hospital Infection Prevention Programs: A Qualitative Analysis
- 18-204 Infection Prevention & Control: It Takes a Village to Succeed!
- 18-205 Leadership Consciousness for 21st Century Infection Preventionists: From Vision to Action
- 18-206 Old Habits Are Hard to Break
- 18-207 Provider Orders and Nursing Documentation of Contact Precautions for Patients with Multidrug-Resistant Organisms (MDROs)
- 18-208 Raising the Bar on Hand Hygiene Compliance: A Leadership Lead System-Wide Initiative
- 18-209 The Creation of an Effective, User-Friendly, Cost-Efficient, Near Real-Time Hand Hygiene Compliance Reporting System

Surveillance E164

- 19-210 A Surveillance System to Monitor the Frequency of Legionella Testing in High-Risk Patients
- 19-211 Acquisition and Infection Caused by Methicillin-Resistant *Staphylococcus aureus* [MRSA]: A Year-Long Comparison of Extended Care and Acute Care Medicine Wards in a U.S. Veterans Affairs Medical Center [VAMC]
- 19-212 Admission Screening for Vancomycin Resistant Enterococcus in a Pediatric Tertiary Care Facility
- 19-213 Assessing Microbial Contamination in Patient Isolation Rooms by Monitoring Mixed Staphylococci Assemblages with Denaturing Gradient Gel Electrophoresis (DGGE) Analysis
- 19-215 Bacteremic Infections: A Year-Long Comparison of Extended Care and Acute Care Medicine Wards in a Veterans Affairs Medical Center [VAMC]
- 19-216 Electronic Surveillance for Central Venous Catheter Bloodstream Infections
- 19-217 Enhanced Detection of Health Events through Biosurveillance in a Joint Veterans Affairs and Department of Defense Medical Center
- 19-218 Infection Prevention Collaboration with Environmental Services: Development of a Monitoring Tool to Improve Surface Disinfection in the Surgical Operating Suite
- 19-219 Pilot Study to Determine Disposition of Mediport Catheters in a Cancer Population

- 19-220 Prospective Surveillance of Surgical Site Infections After Breast Surgery
- 19-221 Risk Factor Analysis of Colonization with Vancomycin-Resistant Enterococci and Methicillin-Resistant *Staphyococcus aureus* Among Patients Admitted to a Medical Intensive Care Unit
- 19-222 Risk Factors for *Clostridium difficile* Nosocomial Diarrhea
- 19-223 *Two Into One Will Not Go? Reporting Surgical Site Infections in Hip Arthroplasty and Hemiarthroplasty of the Hip as Opposed to Hip Prosthesis

Technology E175

- 20-224 ATP Bioluminescence Testing of Hospital Surfaces as a Means to Evaluate Hospital Environmental Cleanliness and Identify Performance Opportunities in Environmental Management
- 20-225 Automated Central Line-Associated Bloodstream Infection Surveillance
- 20-226 Automated Queries Aid in Prompt Notification of Device Related Infections
- 20-227 Developing a Standardized Clinical Template and Reminder for TB Skin Test in a Computerized Patient Record System
- 20-228 Evaluation of the Use of Adenosine Triphosphate (ATP) in Auditing Patient Room Cleanliness
- 20-229 Social Networking Among Infection Preventionists: Use of a Shared Knowledge Website
- 20-230 Use of New Surveillance Technology Assists a Novice Infection Preventionist to Detect and Desist Environmental/Infection Issues of *Clostridium difficile*
- 20-231 Using Multiple Data Sources for Event detection, Monitoring and Situational Awareness in North Carolina

ORAL ABSTRACTS

Device-Related Infections E181

- 232 Reduction in Hospital Acquired Central Line-Associated Bloodstream Infections (CLA-BSI) in a Pediatric Hematopoietic Stem Cell Transplant Population - A Nine Year Experience
- 233 Infection Risk Associated with a Luer-Activated Device LAD
- 234 Nosocomial Bloodstream Infections: The Associated Length of Stay and Costs
- 235 *A Simple Tool to Help Reduce Duration of Indwelling Urinary Catheters

Infection Prevention Programs E184

- 236 Preventing Mediastinitis: Success with the SCIP Bundle and Evidence Based Best Practices
- 237 *Staffing and Structure of Infection Prevention and Control Programs in a National Sample of NHSN Hospitals
- 238 Using Objective Benchmarking to Improve Environmental Hygiene in a Five Hospital Group

Multi-Drug Resistant Organisms E187

- 240 Increasing Healthcare Worker Compliance with Contact Precautions
- 241 *Policies and Practices for Multi-Drug Resistant Organisms in a National Sample of NHSN Hospitals
- 242 A Sensitive Screening Marker for the Identification of Multi-Drug Resistant Gram Negative Bacilli: Using Resistance to Imipenem or Cefepime as a Predictor
- 243 The Role of Environmental Services in a Collaborative Infection Prevention Model to Reduce *Clostridium difficile* in the Greater New York Region

Safety E190

- 244 Protection Offered by Filtering Facepiece Particulate Respirators and Surgical Masks: Lessons from Manikin and Human Subject Studies
- 245 Drive Through to Kill the Flu - Community Outreach Influenza Vaccination Program
- 246 Infection Prevention and Control Competencies for Hospital-Based Healthcare Workers
- 247 Needling Employees into Compliance: Improving Healthcare Worker Influenza Vaccination Rates Through the Use of Time Off Awards

Surveillance E194

- 248 The Effect of Changing the National Healthcare Safety Network (NHSN) Definition of Laboratory-Confirmed Bloodstream Infection (LCBI)
- 249 Surveillance for the Purpose of Discontinuing Methicillin-Resistant Staphylococcus aureus Contact Precautions on an Inpatient Medical Unit: An Exercise in Futility?
- 250 Catheter-Associated Urinary Tract Infection Reduction Using Best Practice Bundle
- 251 Community Associated Staphylococcus aureus Deaths in Florida: A Pilot Project
