

AJIC Contents

American Journal of Infection Control

COMMENTARY

- Disinfection, sterilization, and antisepsis: Principles, practices, current issues, new research, and new technologies** A1
WA Rutala, and DJ Weber

STATE OF THE SCIENCE REVIEW

- Disinfection, sterilization, and antisepsis: An overview** A3
WA Rutala, and DJ Weber

- Medical instrument reprocessing: current issues with cleaning and cleaning monitoring** A10
MJ Alfa

- Best products for skin antisepsis** A17
JM Boyce

- Decontamination devices in health care facilities: Practical issues and emerging applications** A23
CJ Donskey

- New and emerging infectious diseases (Ebola, Middle Eastern respiratory syndrome coronavirus, carbapenem-resistant *Enterobacteriaceae*, *Candida auris*): Focus on environmental survival and germicide susceptibility** A29
DJ Weber, EE Sickbert-Bennett, H Kanamori, and WA Rutala

- Biofilms on instruments and environmental surfaces: Do they interfere with instrument reprocessing and surface disinfection? Review of the literature** A39
MJ Alfa

- Current issues in hand hygiene** A46
JM Boyce

- Nasal decolonization: What antimicrobials are most effective prior to surgery?** A53
EJ Septimus

- Special problems associated with reprocessing instruments in outpatient care facilities: Physical spaces, education, infection preventionists, industry, reflections** A58
J Bringhurst

- What's new in reprocessing endoscopes: Are we going to ensure "the needs of the patient come first" by shifting from disinfection to sterilization?** A62
WA Rutala, H Kanamori, EE Sickbert-Bennett, and DJ Weber

- Using a systematic approach for adopting new technologies in sterile processing departments and operating rooms** A67
R Seavey

- Continuous room decontamination technologies** **A72**
DJ Weber, WA Rutala, EE Sickbert-Bennett, H Kanamori, and D Anderson,
CDC Prevention Epicenters Program
- Reprocessing semicritical items: Outbreaks and current issues** **A79**
WA Rutala, and DJ Weber
- Beyond high-touch surfaces: Portable equipment and floors as potential sources of transmission of health care–associated pathogens** **A90**
CJ Donskey
- Best practices for disinfection of noncritical environmental surfaces and equipment in health care facilities: A bundle approach** **A96**
WA Rutala, and DJ Weber
- Use of germicides in health care settings—is there a relationship between germicide use and antimicrobial resistance: A concise review** **A106**
DJ Weber, WA Rutala, and EE Sickbert-Bennett
