American Journal of Infection Control

MAJOR ARTICLES

- Case-control study evaluating risk factors for SARS-CoV-2 outbreak amongst healthcare personnel at a tertiary care center** 1457
 JI Rosser, R Tayyar, R Giardina, P Kolonoski, D Kenski, P Shen, LM Steinmetz, L-Y Hung, W Xiao, K Bains, T Morrison, A Madison, S-i Chang, L Tompkins, BA Pinsky, and M Holubar
- Impact of In-Hospital infection with SARS-CoV-2 among Inpatients at a university hospital** 1464
 J Tauffer, TCRdO Konstantyner, MCS de Almeida, DB Ferreira, TS Antonelli, DS Fram, DV Escudero, PRA Ferreira, N Bellei, AL Colombo, SM Yashiro, AMdO Machado, and EA Medeiros
- SARS-CoV-2 positivity rates in asymptomatic workers at a cancer referral center in Mexico City: A prospective observational study in the context of adapting hospitals back to regular practice** 1469
 NR Noverón, LP Peralta, DV Compte, LAH Montalvo, SRG Pineda, AAG Gómez, OAR Vega, RC Gutiérrez, AH Miranda, AM Vargas, DdIR Martínez, PC Juárez, and AAM García
- Impact of the modification of a cleaning and disinfection method of mechanical ventilators of COVID-19 patients and ventilator-associated pneumonia: One year of experience** 1474
 MA Cureño-Díaz, EM Durán-Manuel, C Cruz-Cruz, G Ibáñez-Cervantes, MI Rojo-Gutiérrez, CV Moncayo-Coello, MÁ Loyola-Cruz, G Castro-Escarpulli, DMR-B Hernández, and JM Bello-López
- A simulation study to assess fluid leakage through the glove-gown interface in isolation settings** 1481
 Z Kahveci, FS Kilinc-Balci, and PL Yorio
- How clinicians manage routinely low supplies of personal protective equipment** 1488
 LJ Ridge, AW Stimpfel, VV Dickson, RT Klar, and AP Squires
- Clinical outcomes of intervention for carbapenems and anti-methicillin-resistant *Staphylococcus aureus* antibiotics by an antimicrobial stewardship team** 1493
 K Kagami, N Ishiguro, T Yamada, Y Niinuma, S Iwasaki, K Taki, T Fukumoto, K Hayasaka, M Nishida, J Sugita, T Teshima, M Sugawara, and Y Takekuma
- Methicillin-resistant *Staphylococcus aureus* (MRSA) carriage among health care personnel in nonoutbreak settings in tertiary care hospital in Mysore** 1499
 D R, S Khanum, SS R, T A, N Prasad, and RB V
- A four-year follow-up survey of antimicrobial resistance among *Acinetobacter baumannii* complex from inpatients in Southern Brazil** 1503
 LRR Perez, E Carniel, G Dalpiaz, M Vetter, GA Narvaez, and CG Dias

MICROBIAL SURVEILLANCE TESTING MADE EASY

Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing

SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of
Gram-Negative bacteria*

This immediate, practical screening test is available as a swab or flush method. Simply flush the lumen or swab the elevator mechanism of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

< 10 CFU

 **healthmark**

AUDIT WITH THE

FLEXIBLE ENDOSCOPE SAMPLING KIT

Surveillance tool for the random testing of duodenoscopes in compliance with FDA guidelines - In association with Nelson Laboratories

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

CLEAN

THAT KEEPS EVOLVING

Your needs are evolving. So is Clorox.

We've expanded our trusted product lineup with the new Clorox® TurboPro™ Handheld Electrostatic Sprayer and Clorox Healthcare® Spore¹⁰ Defense™ Cleaner Disinfectant. Now you can pair a mobile electrostatic device with a powerful sporicidal chemistry to kill pathogens in hard-to-reach spaces. Because evolution is in our nature.
